Shireburn Financial Manager

Shireburn Financial Manager (SFM) is a fully fledged financial accounting solution designed to combine a high level of capabilities with ease of implementation and use. Easy to use by small to medium businesses yet offering capabilities required by larger organisations, SFM is already the bedrock of accounting for thousands of companies.

SFM supports a multi-user, multi-company and multi-currency environment including full financial and management reporting. Its data-centric design allows users to have immediate access to information. SFM also provides an unrivalled total cost of ownership compared to systems of similar capability.

Integration

SFM integrates directly and seamlessly with:

- **Shireburn Inventory Management System** (SIMS) for inventory management across retail, distribution and manufacturing business processes
- **Shireburn Payroll and HR Manager** (SPS) for handling payroll and human resources management
- **3rd party products** through the SFM Interface Gateway module

One Integrated Solution for Your Business

Seamless and direct integration with our Inventory, Payroll and HR Solutions eliminating user intervention altogether.

SFM Modules

SFM's modular approach allows companies to implement those modules designed specifically to address their needs. SFM modules include:

- Sales ledger
- Nominal ledger
- Purchase ledgers
- Consolidation
- Job costings
- Hire purchase management
- Fixed asset management
- Document management
- Credit control with standard letters
- eStore
- eStatements
- Invoice factoring
- Voyage ledger for freight companies
- SFM Interface Gateway module – allows 3rd party systems to interface with SFM
- SEPA module

Created for Local Business

SFM is designed locally, for companies operating in Malta and is supported here by people understanding local requirements and regulations. SFM has been designed specifically for the sizes and characteristics of local businesses and we continuously add functionality specifically relevant to the local scenario.

Our Support

Both our technical and advisory support ensures that you never face a problem alone again. Our SFM support team offers the highest levels of customer service, ensuring that organisations are able to implement SFM easily and continue to operate smoothly for years to come. In addition, throughout the years, Shireburn has gained a reputation for providing high levels of customer support, going beyond the technical maintenance and extending to business process assistance.
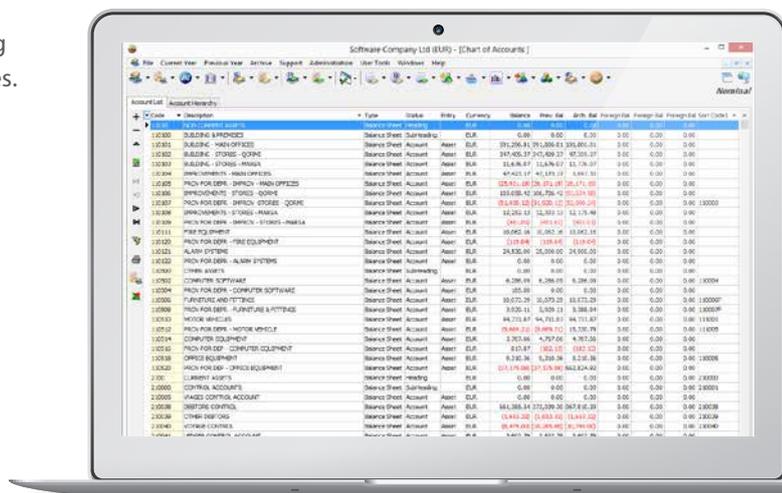

SFM Features

- **Manage multiple companies** and give users controlled access to the different companies.

- **Effective multi-currency management**.

- **VAT management** functionality ensuring detailed auditing of each VAT related transaction and providing transaction level detailed reports analysed by VAT category, nominal account, date, etc. This ensures availability of supporting documentation for VAT returns, saves time in determining your VAT status and maximises controls. Supports accrual and cash accounting for VAT returns. VAT functionality also includes the export in EDI format to submit the recapulative statement.

- **Extensive Reporting** available throughout SFM including multiple charts of accounts.

- **Analysis** of accounting by department, cost centre and sub-analysis within an account.

- **Exporting** of reports to Microsoft Excel™, Microsoft Word™ or PDF and can be emailed directly out of the system, maximising speed and convenience.

- **Management of bank and cash accounts**.

- **Accounts Receivable and Payables Management and Reporting,** including aged analyses, realisation of gain/loss on exchange, payment allocation, reversal of mispostings with audit functions, display and reporting of records per ledger.

- **Viewing balance** of the last three financial years.

- **Posting of opening entries** once, when implementing the system.

- **Standard entries** to manage pre-payment and accruals.

- **Supports SEPA payments** to creditors electronically via bank 24x7 systems.

- **Bank reconciliations** with extensive search and direct posting of differences, reporting and tagging, including archive management and reporting.

- **Budget control** and comparison reporting.

- **Manage accounts across multiple years** with ability to close a financial year to start to work on the new one, while still posting in a controlled manner into the previous year.

- **Archive of unlimited years**.

- **Pro-forma invoicing** allowing staff to process draft transactions that are subject to approval or verification before posting.

- **TIFD Codes** – Generate reporting to tax authorities using the TIFD code format and generate the Microsoft Excel™ spreadsheet required for electronic submission.

- **Macros and invoice templates** enable the automation of repetitive text into invoices thus enhancing productivity.

- **Security** with allocation of rights to access to data as well as to features, ensuring users' access levels are controlled. Retains of detailed audit logs of data updates and more.

The perfect balance of functionality and ease of use, ensuring you can run your business with confidence.

Benefits for your Business

- **Functionality** – Broad and deep capabilities addressing the full accounting needs of small to medium businesses.

- **Practical and easy to use** - Drill down and across to access more detailed information.

- **Low implementation costs** – Ease of implementation of SFM ensures that implementation costs, including training, are kept to a minimum.

- **Secure** – Controlled access to features and functions, and in-depth auditing and security functions to protect your business data.

- **Relevant** – SFM is created, maintained and supported locally by Shireburn.

- **Updates** – New features are regularly available electronically for download to companies covered by the Shireburn Support Scheme.

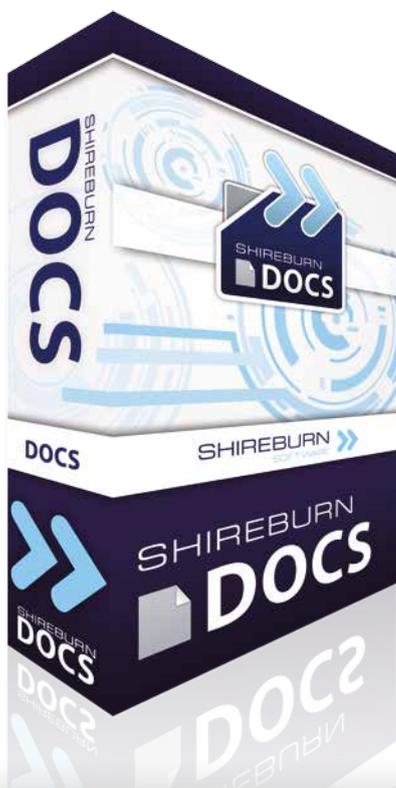

Easy and controlled access to your data

Usability

While most software products claim to be user-friendly, SFM reportedly offers higher degrees of usability than competing products. Data is readily made available in fully searchable grids with drill-down and side-drilling capabilities. A data-centric approach ensures that SFM is practical, simple to use and results in high levels of productivity.

But don't take our word for it. Contact us for a demo of the solution.

Document Management

SFM integrates closely with **Shireburn DOCS**, the document management solution designed to cut down the pushing of paper across an organisation, provides immediate electronic access to documentation to authorised users, and secures paperwork against loss, fire or flood.

While the documentation created by SFM is automatically loaded into Shireburn Docs, both signed copies of your own documentation as well as incoming 3rd party documentation submitted by suppliers such as invoices are able to be scanned in and, through the use of QR codes, be automatically uploaded into Shireburn Docs.

SFM's integration with Shireburn Docs enhances user productivity, while reducing costs and enhancing data security.
